Thursday, April 30, 2015
Lunch begins at 11:00 am
Education Session 11:30 am – 1:00 pm

Topic & Speakers

Gwen Brittain, AR Chapter LICA President

A brief introduction to LICA and the many national and state benefits for earth moving contractors. Also, updates on the LICA National Convention to be held July 13-18 in Little Rock, AR

Tom Fortner, Bayou Meto Water Management District
Dennis Carman, White River Irrigation District

An overview of the White River/Bayou Meto Irrigation Districts progress and plans, *plus* an update on the Mississippi River Basin Initiative. Water is one of Arkansas' most valuable resources and its protection and conservation are of paramount importance. The agricultural economy, which supports the eastern Arkansas region, cannot exist without a dependable supply of irrigation water. Continued withdrawals at the current rate will deplete the Alluvial and Sparta aquifers. The economic and environmental results would be catastrophic. Massive irrigation projects are underway. These speakers will discuss projects completed and upcoming projects for contractors to consider.
